ENOUGH!!! End this witch hunt now. I am tired of the government spending my money on lawsuits to give advantages to big-money software companies under the guise of fair trade. If netscape and Sun can't use their own resources to compete, don't use my pitiful tax contributions to increase their wealth. Let the market place dictate terms of cooperation, not the government. This lawsuit has contributed to the recession enough. Don't let it go any further. Settle!!

Thank you.

Jim Malneritch, taxpayer and voter.
